DAIRYFLOW[®] PERFORMANCE-ENGINEERED MILK TUBING

DairyFlow[®] milk tubing is engineered to address the specific needs of dairy farmers who work with raw milk hoses day in and day out. After listening carefully to milk producers, Techflex[®] Inc. has developed what we feel is the finest raw milk tubing available today. About one-third lighter than other raw milk transfer tubing, DairyFlow[®] hoses are easier to lift and move. Our advanced material remains extremely flexible in sub-freezing conditions, which extends hose utility in colder months. Because DairyFlow[®] hoses are highly resistant to sanitizing chemicals and to temperatures, they are extremely long lasting. Unlike traditional silicone and rubber milk tubing, DairyFlow[®] has superior tear resistance and does not shed carbon. Techflex[®] Inc. takes milk quality and ecological concerns very seriously. Our DairyFlow[®] tubing material is plasticizer-free, meaning it contains no phthalates which are known to cause environmental and health issues. In addition, we certify that we use no animal derived lubricants in the manufacturing process, as these can potentially cause contamination of finished milk.

AVAILABLE COLORS

Blue and Green

APPLICATIONS

Raw Milk Transfer (Vacuum/Pressure)

BENEFITS

About 1/3 Lighter than Silicone and Other Products

As Flexible as Silicone

Extreme Flexibility in Sub Zero Conditions

Superior Tear and Abrasion Resistance

Phthalate Free/ Animal Derived Ingredient Free

Resistant to Acids and Bases

CERTIFICATIONS

Phthalate-Free

U.S. Pharmacopeia Class VI Certification

Cytotoxicity Criteria

CFR Title 21 Section 177.1810

REACH and RoHS Compliant

Traceability: Lot and Batch

Animal Derived Ingredient Free
