

Expandable Nylon Sleeving

Kable Kontrol® Expandable Monofilament Nylon Braided Sleeving is an economical yet durable solution to protect hoses and wires. Nylon braided sleeving is constructed from nylon 6/6 Polyamide filaments which have excellent abrasion resistance, heat resistance, chemical resistance and therefore will last longer than most other general-purpose sleeving. Due to nylon sleeving's high temperature and chemical fluid resistance it has become a popular choice for the automotive industry.

- **Material: Nylon 6-6 Monofilament**
- **Chemical Resistant**
- **Resistant to Common Automotive Fluids & Solvents**
- **Operating Temperature Range: (-76°F – 320°F)**
- **Inside Diameters Are Measured as Round Not Flat**

SKU	Inside Diameter	Color	Sizing (ft)
