

HEAVY
DUTY

- **Heavy Abrasion Guard**
- **Cut-Through Resistance**
- **Self Closing Wrap**
- **Resists To Chemicals & Automotive Fluids**
- **Great Spot-Protection**
- **No Tool Install**
- **Lightweight And Very Flexible**

Chafe Protection F6® Heavy Wrap

F6® HEAVY (F6H) is a unique composite wrap-around chafe guard made from resistant synthetic polymers. Techflex® F6® Heavy Wrap is reimagined from the ground up to protect hoses and cables from chafing and abrasion. The easy wrap installation technology is a first for the hydraulic and fluid transfer industry. By combining the extreme cut and abrasion defense of a traditional woven nylon protection sleeve and the self-wrapping properties of our best-selling F6® line of products we have created a new standard for fast in field hose and wire protection.

We have eliminated the need to disconnect fittings, connectors and hoses in order to properly protect your systems from damage. Simply apply F6® Heavy and get back work.

F6® HEAVY Wrap is specially designed to protect high voltage battery cables in hybrid and electric vehicles from crash and cut-through damage. It also allows to avoid short circuit on power lines by isolating the electrical system from the rest of the vehicle. F6H keeps wiring harness systems safe and secure in case of accidents; driver and passengers protection but also safety teams against high electrical loads.

Nominal Size	Part #	Wall Thickness	Standard Put-Ups			Available Colors	Lbs/100'
			Bulk Box	Box A	Box B		
3/8"	F6H0.38BK	.06"	1,200'	150'	75'	Black BK	3.2
1/2"	F6H0.50BK	.06"	800'	100'	50'	Black BK	3.9
5/8"	F6H0.63BK	.06"	500'	100'	50'	Black BK	4.7
